٠.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 4 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Ninnis.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-3 and 6-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over

Ninnis.

Ninnis discloses all of the claimed subject matter, except for the magnetic poles. This feature is considered an obvious design consideration, since poles are old and known in the art.

Claims 10-16, 20 and 33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hirama et al, of record.

Hirama discloses all of the claimed subject matter, note fig. 7A, except for detecting rope degradation and the use of Hall effect transducers. These features are considered obvious design considerations since they are old and known in the art.

Claims 17-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 5 and 32 are allowed.
